ABOUT

I'm an enthusiastic software developer with strong problem-solving skills and a passion for creating efficient and scalable solutions.

I am constantly seeking opportunities to expand my knowledge and stay up-to-date with the latest industry trends, ensuring that I can contribute innovative ideas and solutions to any development project.

Willing to work remotely with teams to embrace new challenges and achieve success.

EXPERIENCE

1lint   2022–2023
[A service-based startup]

Developer

Got my first exposure to the industry as an intern and later graduated as a backend engineer, during which I primarily worked with Node.js and its ecosystem and later explored some DevOps sides of things.

Due to the service nature of the company, I had the opportunity to work on a diverse range of projects, sometimes with teams.

Technical highlights:

- Worked on many demo projects, most of which were built from the ground up with various different tech stacks.

- Worked on many different scales of projects to assist in maintaining the project for various new requirements. Also helped in migrating legacy code to Node with an industry standard stack and best practices.

- Later, I explored some infrastructure-related things, helped standardize dev environments, and setup some production stuff.

EDUCATION

ATMIYA UNIVERSITY   2019–2022

Bachelor Of Science in Information Tech.

Technical Skills

- TypeScript, JavaScript, Python, Go, Bash, Git, Linux, Aws, MySQL, Postgres, MongoDB, Redis, WebSocket, Socket.io, Nodejs, Deno, CD/Ci, and more…

Interests

- Cloud-computing, Automations, Security…

Miscellaneous: *Born:* November, 2000
